

STUDENT LIFE READINESS PROGRAM

Partnership Guide

Built on the Interior Essentials Readiness Framework™

Practical Learning. Real Application. Lasting Impact.

Document ID: EP-201 | Version 1.0

1. The Student Success Challenge

Academic success is only one part of student success. Students also navigate finances, wellness, communication, career planning, independent living, and major life transitions. Readiness education strengthens their ability to respond with confidence and practical judgment.

2. The Interior Essentials Readiness Framework™

The program follows four progressive stages: PREPARE, EQUIP, APPLY, and THRIVE. Each stage moves students from foundational knowledge to practical action and sustained growth.

PREPARE	EQUIP	APPLY	THRIVE
Foundation	Tools	Action	Growth

3. The Student Experience

Students learn through concise digital lessons, reflection, interactive activities, downloadable tools, action planning, progress tracking, and real-world application.

4. Outcomes for Students & Institutions

Students build confidence, decision-making, communication, financial readiness, independent living skills, career readiness, and well-being. Institutions gain a scalable resource that supports engagement, persistence, transition, and holistic student development.

5. Flexible Partnership Model

Partnerships may be structured for one department, 2–5 departments, or institution-wide implementation for 6+ departments. Scope and support are tailored through the Partnership Proposal.

Department	Multi-Department	Institution-Wide
1 department	2–5 departments	6+ departments / broad campus scope

6. Let’s Build Student Readiness Together

Interior Essentials provides a structured, low-lift implementation model supported by partner resources, launch guidance, and ongoing program support.

Signature Principle

Readiness is measured not by what students know, but by what they are prepared to do.
